To the Directory Users:

The September 1996 edition of the Environmental Protection Agency (EPA) Headquarters Telephone Directory is as up-to-date as possible, based on available information.

The Enterprise Technology Services Division appreciates the cooperation of the organizational and administrative contacts who provided us with the requested updates within a short time frame. Also, we would like to thank Washington Telecommunications Center personnel who produced the Directory, as well as PMA Design, Inc. staff who created the cover, the artwork for the separator pages, and the graphic layout.

Our objective is to continue to present useful, accurate information in an easy-to-use format. Directory users can assist us in continuing to improve the quality of our product. Revisions to the Directory should be submitted to: Washington Telecommunications Center, 3406, Room WTC A-6, ATTN: Directory Production Staff. Questions may be directed to Ms. Leilani Giroux of our contractor staff at (202) 260-8554 or to the EPA Publisher, Dwight Rodgers, at (202) 260-2082.

# Telephone Dialing Procedures

---

## Local Dialing

To place a local call within your area code

Dial 9 + 7-digit number.

To Place a local call outside your area code

Dial 9 + 7-digit number.

To place calls within EPA Headquarters locations (District of Columbia, Virginia, Maryland), please refer to the dialing chart on pages 6 and 7.

## To Reach a Local Commercial Operator

Dial 9 + 0.

## To Place Emergency Calls

Dial 9 + 911.

## Long Distance Dialing (FTS2000)

To place a long distance FTS2000 call

Dial 9 + 1 + area code + 7-digit number.

## To Place "800" Calls

Dial 9 + 1 + 800 + 7-digit number.

## International Dialing

### International Access

International long distance service is provided to EPA through a contract with MCI. Calls from the U.S. to international locations can only be place on unrestricted telephone lines. To obtain an unrestricted line, please have your Administrative Officer upgrade your level of service in accordance with the following procedures: (1) complete an EPA Telecommunications Service Request (TSR), Form #5020-1 (Rev. 10-93); (2) include the appropriate justification; and (3) submit the form to the Washington Telecommunications Center (WTC), 3707. Call (202) 260-6778 for more information.

### To Call Canada

Dial 9 + 1 + area code + local 7-digit number.

### To Call Caribbean Countries

Dial 9 + 1 + 809 + local 7-digit number.

## **To Call Europe, Asia, South America, Africa, or Australia**

Dial 9 + 011+ country + city code + local number.

Note: See the Reference section of this Directory for international country codes.

## **International Dialing Exceptions**

Some countries, such as China, cannot be dialed directly using the commercial network. These countries must be reached through a commercial operator.

To reach a commercial operator

Dial 9 + 1 + 0.

## **International Information and Assistance**

International country and city codes, as well as rate information, may be obtained by dialing MCI's toll-free International Information Service.

To reach MCI's International Information Service

Dial 9 + 1 + 800-678-5758.

# EPA Headquarters Alphabetical Section and Locator Updates

---

The EPA Headquarters Express Locator Form, #5040-13, is presented on the following page. Any changes, additions, or deletions to the Locator database must be signed by your administrative contact, listed in the Telephone Directory Update Contact section of this publication, and submitted to the Washington Telecommunications Center (WTC), Directory Production, 3406. Under normal circumstances, Locator changes are processed within 24 hours of receipt. Locator changes may be verified by calling the EPA Locator at (202) 260-2090, Monday through Friday, from 8 a.m. to 6 p.m., e.s.t./e.d.t.

The accuracy of the Locator database is critical. Personnel Locator, EPA mail room, and guard service functions all depend on the quality of the Locator information. Every employee, supervisor, and administrative contact can assist in the effort to keep the Locator information as accurate and up-to-date as possible. If you have any questions concerning Locator updates, please call (202) 260-3765.

# Telephone Directory Update Contacts

The following Telephone Directory contacts have been designated to provide and verify data for the alphabetical section of this publication. These alphabetical section contacts are listed according to mail code. Each EPA employee and supervisor is responsible for coordinating with the appropriate Telephone Directory contact to ensure that updates to the information (names, mail code, phone numbers, room numbers, etc.) are submitted properly for inclusion in the directory. It is important that updates be coordinated with the appropriate contact.

# Organization of the Environmental Protection Agency

---

The Environmental Protection Agency (EPA) was established as an independent agency in the Executive Branch of the U.S. Government, pursuant to Reorganization Plan No. 3 of 1970, effective December 2, 1970. EPA was created to enable coordinated and effective government action on behalf of the environment. EPA endeavors to achieve systematic control and abatement of standard-setting, and enforcement activities.

EPA also provides coordination and support for research and antipollution activities conducted by State and local governments, private and public groups, individuals, and educational institutions. In addition, EPA reinforces efforts on the part of other Federal agencies to assess the impact of their operations on the environment. EPA furnishes written comments on environment impact statements and publishes its findings, especially when those reveal that a proposal is unsatisfactory from the standpoint of public health or welfare or environmental treatment. In all, EPA is designed to serve as the public advocate for a safe, habitable environment.

# Office of Air and Radiation

# ASSISTANT ADMINISTRATOR FOR AIR AND RADIATION

The Office of the Assistant Administrator for Air and Radiation oversees the air activities of the Agency. Air activities include development of national programs, technical policies, and regulations for air pollution control. The Office also oversees the development of national standards for air quality, as well as emission standards for new stationary sources and hazardous pollutants. The Office provides technical direction, support, and evaluation of regional air activities; enforcement of standards; and training in the field of air pollution control. The Office furnishes technical assistance to states and agencies that have radiation protection programs and administers a national surveillance inspection program for measuring radiation levels in the environment. Further, the Office conducts comprehensive acid rain research, analyzes the impact of pollutants found at the workplace, and studies the effects of global change.

# Office of Enforcement and Compliance Assurance

**Organization**

# ASSISTANT ADMINISTRATOR FOR ENFORCEMENT AND COMPLIANCE ASSURANCE

The Assistant Administrator for Enforcement and Compliance Assurance (AA/OECA) serves as the Environmental Protection Agency's (EPA's) National Program Manager and principal advisor to the Administrator for matters concerning the Agency's enforcement and compliance assurance program. OECA manages a national criminal enforcement program and provides technical support to EPA Headquarters, EPA Regions, and the states through the National Enforcement Training Institute. OECA manages the Agency's regulatory, site remediation, and Federal facilities enforcement and compliance assurance programs, as well as the Agency's environmental justice program and Federal activities program responsibilities under the National Environmental Policy Act.

# Office of Prevention, Pesticides, and Toxic Substances

# ASSISTANT ADMINISTRATOR FOR PREVENTION, PESTICIDES, AND TOXIC SUBSTANCES

The Office of the Assistant Administrator for Prevention, Pesticides, and Toxic Substances develops national strategies for toxic substance control. The Office establishes criteria for assessing chemical substances and sets standards for chemical testing protocols. The Office develops rules and procedures for industry reporting and regulations for controlling substances deemed hazardous to humans or the environment; the Office also enforces standards. The Office analyzes the effects of new chemicals and new uses of existing chemicals to determine any hazards and develops restrictions accordingly. The Office also administers activities associated with pesticide control, regulations, and monitoring. These activities comprise promoting the reduction of pesticide use, establishing tolerance levels for pesticides in food, and investigating pesticide accidents.

# Office of Research and Development

## Organization

# ASSISTANT ADMINISTRATOR FOR RESEARCH AND DEVELOPMENT

The Office of Research and Development is responsible for the research and development needs of the Agency's operating programs and the conduct of an integrated research and development program for the Agency. The Assistant Administrator for Research and Development serves as the Agency's principal science advisor and is responsible for the development, direction, and conduct of a national program. The national program encompasses health risk assessment, health effects, engineering and technology, processes and effects, acid rain deposition, monitoring systems, and quality assurance. The Office provides for the dissemination of scientific and technical knowledge, including analytical methods, monitoring techniques, and modeling methodologies. The Office also provides technical and scientific advice on Agency-wide technical program issues as well as on the development of Agency policy standards and regulations.

# ASSISTANT ADMINISTRATOR FOR SOLID WASTE AND EMERGENCY RESPONSE

The Office of the Assistant Administrator for Solid Waste and Emergency Response provides Agency-wide policy, guidance, and direction for the Agency's solid waste and emergency response program. The Office develops guidelines and standards for the land disposal of hazardous wastes and for underground storage tanks. The Office furnishes technical assistance in the development, management, and operation of solid waste activities and analyzes the recovery of useful energy from solid waste. The Office has also undertaken the development and implementation of a program to respond to abandoned and active hazardous waste sites and accidental releases (including some oil spills) as well as the encouragement of innovative technologies for contaminated soil and groundwater.

# ASSISTANT ADMINISTRATOR FOR WATER

The Office of the Assistant Administrator for Water is responsible for the Agency's water quality activities, which represent a coordinated effort to restore the nation's waters. The functions of this program include developing national programs, technical policies, and regulations relating to drinking water, water quality, and ground water; establishing environmental and pollution source standards; and providing for the protection of wetlands. In addition, this Office furnishes technical direction, support, and evaluation of regional water activities; enforces standards; and develops programs for technical assistance and technology transfer. The Office oversees the provision of training in the fields of water quality, economic and long-term environmental analysis, and marine and estuarine protection.

**NOTE:** These Organizational Contacts provided the primary data for the information in this directory. Additionally, this data was reviewed by the Organization and Management Consulting Services (OMCS) for accuracy with respect to program office from division level and above. All other data — mail code, room number, and phone number — are the responsibility of the organizational contacts listed above. Please coordinate updates for the organizational directory with the above contacts. In addition, please note that, at present, this organizational database is separate from the EPA Headquarters Locator database which produces the alphabetical directory. Updates to the locator should be coordinated with your Administrative Officer.

Regional Administrators are responsible for Environmental Protection Agency (EPA) regional programs within their respective jurisdictions. Regional Administrators cooperate with Federal, State, interstate, and local agencies, as well as with industry, academic institutions, and other private groups, to ensure that regional needs are addressed and that Federal environmental laws are upheld.

Regional Administrators develop, propose, and implement regional programs for comprehensive and integrated environmental protection activities. Regional Administrators also manage effective regional enforcement and compliance programs. The regional offices support the Agency's overall mission by translating technical program direction and evaluation for various Assistant Administrators and heads of Headquarters staff offices into effective operating programs at the regional level. In addition, regional offices ensure that such programs are executed efficiently, that approval authority for proposed State standards and implementation plans is exercised appropriately, and that overall and specific evaluations of regional programs are provided. EPA maintains regional offices in the following cities: Boston (Region 1), New York (Region 2), Philadelphia (Region 3), Atlanta (Region 4), Chicago (Region 5), Dallas (Region 6), Kansas City (Region 7), Denver (Region 8), San Francisco (Region 9), and Seattle (Region 10).

# Telecommunications Services

Headquarters Telecommunications Services are provided by the Headquarters Services Branch of the Office of Information and Resources Management.

Telephone contractor staff offices are located in the Washington Telecommunications Center (WTC), in the commercial mall area of Waterside Mall.

Employees may provide feedback for any Telecommunications services by dialing (202) 260-1001 and pressing option #1.

## Telephone Usage Policy

### Use of Telephones for Official Business

According to Title 31 U.S.C. 1348(b), Government-provided and commercial long distance telephone service paid for by the Government is to be used to conduct official business only. Pursuant to FIRM 41 CFR Part 201-21.6, official business may include personal emergency calls and those calls determined by the Agency to be necessary in the interest of the Government. Personal emergency long distance calls are addressed in the following section.

### Personal Emergency Calls

Examples of personal emergency calls include:

- Calls to notify family, doctor, or others, when an employee becomes ill or is injured on the job.
- Calls by an employee traveling on Government business to notify family of a schedule change or transportation delay.
- Brief calls (8- to 10-minute calls) to home each day (one call per day) by an employee traveling for more than one night on Government business.
- Calls to home by employees required to work overtime without advance notice. Each call, which is limited to the employee's local commuting area, is to advise family members of the change in schedule or to make alternative transportation or child care arrangements.
- Brief daily calls (2- to 3-minute calls) to locations within the local commuting area to ensure the safety and well-being of minor children.
- Occasional, brief calls within the local commuting area to individuals or offices that can be reached only during working hours, such as local Government agencies or physicians.
- Brief calls to locations within the employee's local commuting area to arrange for emergency home or automobile repairs.

## Domestic Long Distance Services

### FTS2000 Service

Domestic long distance service is available through the Federal Telecommunications System (FTS2000) network. FTS2000 is the long distance voice network for the Federal Government. FTS2000 is managed and operated by the Office of Information Resources Management (OIRM) of the General Services Administration (GSA).

### Use of FTS2000 Service

Official long distance calls may be placed to every Government agency and commercial number in the United States, including Puerto Rico, the Virgin Islands, Hawaii, and Alaska.

FTS2000 is a station-to-station dial system. EPA is charged for every FTS2000 call that is answered, whether or not the party with whom the caller wishes to speak is available. For this reason, if the party being called is not available, the caller should try to conduct business with someone who is available to take the call.

## To Report FTS2000 Troubles

Dial the Telephone Help Desk at (202) 260-HELP (4357).

## FTS2000 Billing

FTS2000 long distance calls are not "free" after normal working hours. EPA is charged for all long distance calls, including those that are placed after-hours, weekends, and holidays.

FTS2000 charges are computed on the following basis:

- The time the telephone call is made (day, evening, night)
- The duration of the telephone call (in minutes)
- The distance of the transmission (in miles)

## Official Long Distance Calls While Traveling

Official long distance calls should be placed from an FTS2000 number whenever possible. If FTS2000 is not available on travel, please check dialing procedures within your travel area and select the most economical dialing rate.

## Collect Calls

Because of the high cost of collect calls, EPA employees are strongly discouraged from either placing collect calls to EPA or accepting collect calls placed to EPA. If a collect call must be accepted, the employee accepting the call should record the calling party's name and number and return the call over the FTS2000 network.

## Third-Party Calls

Because of high costs and the availability of other calling options, EPA employees should not place third-party calls billed to EPA. Instead, employees are encouraged to use FTS2000 or dial directly.

## Use of Personal Calling Cards

Employees may use their personal long distance calling cards (e.g., AT&T, MCI, and Sprint) to charge personal long distance calls to their home telephone bills. If possible, such calls should be placed during lunch break or other off-duty periods to avoid interference with the performance of official duties. To use most personal calling cards, you must use the "800" telephone number listed on the card.

## Use of Government-Issued Domestic Calling Card

Government-issued domestic long distance calling cards are available for employees who frequently travel and do not have access to FTS2000 service. To obtain a domestic travel calling card, call the Washington Telecommunications Center (WTC) at (202) 260-3429.

## International Telecommunications Services

### Voice and Data Telecommunications Services

International voice and data telecommunications services are provided to EPA through a contract with MCI. Program office requests for international telecommunications services should be submitted through a program office Administrative Officer. To obtain international telecommunications services, the Administrative Officer must (1) complete an EPA Telecommunications Service Request (TSR), Form 5020-1 (Rev. 10-93); (2) include the appropriate justification; and (3) submit the form to the Washington Telecommunications Center (WTC), 3406. Each program office will be required to fund requested services. Call (202) 260-6778 for more information.

## Use of Government International Travel Calling Cards

The Headquarters Services Branch provides international calling cards for employees on travel abroad. To assist EPA employees on international travel who require access to voice and data communications, the EPA International Telecommunications Quick Reference Guide (publication number EPA/208-K-93-006) contains dialing instructions, country codes, and other pertinent information. Call (202) 260-9600 to obtain an international calling card or a copy of the International Telecommunications Quick Reference Guide.

## Telephone Support Services and Information

### Working Capital Fund

EPA plans to launch a Working Capital Fund (WCF) for all telecommunications and data processing services and for postage effective October 1, 1996. Working Capital Fund services and rules are described in Agency documentation available from the WCF staff (919-541-7773).

Those services which are either available exclusively to Headquarters program offices or which are managed by the staff of the Enterprise Technical Services Division's Headquarters Services Branch are shown below. Information about these services is available from the individual service contact persons. The services managed by the Headquarters staff as of October 1, 1996, along with the service code and the ETSD service contact, are:

- Voice Mail

- Teleconferencing

For further information and scheduling, call (202) 260-6778. To register for a voice mail or ISDN training class, call the Washington Telecommunications Center (WTC) training line at (202) 260-1001.

## EPA Directory Assistance (Locator) Service (202) 260-2090

EPA directory assistance and personnel Locator information is available between 8 a.m. and 6 p.m., e.s.t./e.d.t., Monday through Friday except for Federal holidays. The Locator provides directory assistance information about EPA Headquarters employees and most field employees (name, phone number, location, mail code) to both EPA employees and the public. To reach a Locator operator, dial (202) 260-2090. EPA Locator service is also equipped with a Telecommunications Device for the Deaf (TDD/TTY) to serve hearing-impaired callers. The TDD/TTY number for the Locator is (202) 260-3658.

## EPA Headquarters Locator Updates

EPA Headquarters Locator information is maintained on a computer system at Headquarters, and the database is updated daily. All personnel are responsible for informing the Washington Telecommunications Center (WTC) of office relocations and other Agency personnel changes so that Locator information is as accurate as possible.

Changes to the Locator should be indicated on EPA Headquarters Express Locator Form 5040-13. The form should be signed by an Administrative Officer and sent to the Washington Telecommunications Center (WTC), 3406, ATTN: Directory Production. Locator forms are available in the Supply Store at Waterside Mall. For more information, call (202) 260-3765.

## EPA Headquarters Telephone Directory Updates

Changes to the Subject section of the EPA Headquarters Telephone Directory should be indicated on Form 5040-14. The form is available at the Waterside Mall Supply Store. The form should be signed by an Administrative Officer and sent to the Washington Telecommunications Center (WTC), 3406, ATTN: Directory Production. Changes to other sections of the Directory (e.g., Organizational and Regional sections) should be sent to the same address.

## Request for Telephone Equipment and Services

Employee requests for telephone equipment and/or services should be arranged through the appropriate Administrative Officer. To initiate or modify service, the Administrative Officer must (1) complete an EPA Telecommunications Service Request (TSR), Form 5020-1 (Rev. 10-93); (2) include the appropriate justification and funding information; and (3) submit the TSR to the Washington Telecommunications Center (WTC), 3406. Employees should promptly inform their Administrative Officer of equipment or services that are no longer needed. For information or assistance concerning telephone equipment and services, call (202) 260-HELP (4357).

## Removal of Telephone Equipment

All telephone equipment is owned by EPA. The removal of any telephone equipment from EPA premises will be considered theft, which may result in arrest and prosecution.

## Telephone Repair

All local and FTS2000 long distance telephone service problems should be reported to (202) 260-HELP (4357). Employees should never contact the commercial repair operator directly, because this can result in unnecessary repair charges. Each organization will be held responsible for expenses incurred by calling the commercial repair operator.

## Voice Mail

### Voice Mail Services

Voice mail provides automated telephone answering and message processing services to over 7,500 subscribers at EPA Headquarters locations. In addition to voice messaging, the Headquarters voice processing program offers a wide range of special applications that increase the level of service provided to the public and reduce operating expenses. These specialized applications are designed to disseminate information quickly, and they can be made available in English or Spanish. The Headquarters Services Branch (HSB) can assist program offices in assessing the need for an application, determining the type of application that best meets that need, and designing the application to serve that need in the most effective manner.

For more information about voice mail and message processing services, call (202) 260-6778 and ask to speak to a voice mail representative. To report problems with voice mail service, call (202) 260-HELP (4357).

All voice mail service includes unlimited voice mail training. Training classes for both new and experienced voice mail subscribers are conducted weekly at the Washington Telecommunications Center (WTC). To register for a voice mail training class, call (202) 260-1001 and respond to the automated prompts.

### National Voice Mail Network

Voice mail services at Headquarters and many field sites are now interconnected, creating a national voice mail network. The network provides messaging capabilities between voice mail subscribers anywhere on the EPA network. Subscribers at network locations can now reply to a message, send a copy of a message, or record and send a new message through the network. Network locations are limited to those sites that use Otel voice processing systems. These sites within the national network are as follows:

- Ada, OK
- Athens, GA
- Annapolis, MD (Severn Avenue)
- Annapolis, MD (CBLO)
- Ann Arbor, MI
- Bay City, MI
- Boston, MA (Canal Street)
- Boston, MA (JFK Building)
- Chicago, IL
- Cincinnati, OH
- Corvallis, OR
- Crystal City, VA
- Denver, CO
- Edison, NJ
- Grosse Ile, MI
- Gulf Breeze, FL
- Helena, MT
- Kansas City, KS
- Las Vegas, NV
- Montgomery, AL
- N.E. Research Laboratory, Boston, MA
- New York, NY
- Norwood, OH
- Philadelphia, PA
- Research Triangle Park, NC
- Richmond Laboratory, Richmond, CA
- San Francisco, CA
- Seattle, WA
- Washington, DC
- Wheeling, WV

## Radio Frequency Management

Radio communications systems at EPA support both mission-critical emergency response and environmental monitoring activities, as well as administrative, maintenance, security, and operational functions that require rapid, two-way communications. The Headquarters Services Branch obtains radio frequency assignments for program offices from the National Telecommunications and Information Administration (NTIA) and provides advice on other radio frequency matters.

Radio communications equipment procured and operated by EPA program offices may operate only on Government-assigned radio frequencies and must comply with Federal radio frequency regulations cited in Policy No. 300.12 of the U.S. EPA ETSD Operational Policies Manual. The Radio Frequency and Equipment Acquisition Guide (publication number EPA/208/R-93-001, May 1993) provides information and guidance on requesting radio frequency support. For further information or assistance, call (202) 260-8365.

## Cable, Facsimile, and Telex Message Services

The Secure Telecommunications Center (STC) offers cable, facsimile, and telex message services. These services are provided on a chargeback basis or by special arrangement with the Washington Telecommunications Center (WTC). Services include sending and receiving unsecure cable, facsimile, and telex messages, as well as secure (classified) cable and facsimile messages. Secure messages may be sent only to locations that have equipment capable of receiving secure messages. For more information about cable, facsimile, and telex message services, call (202) 260-3679.

## Cellular Telephone Service

Cellular telephone service can be obtained by Headquarters program offices located in the Washington, D.C., area through a cellular contract administered by the Headquarters Services Branch (HSB). The contract includes state-of-the-art cellular phones with a 3-year warranty; provides for cellular activation, monthly access and air-time, which includes roaming service; and allows for transfer of existing individual cellular accounts and phone trade-in allowance. The cellular contract includes installation, maintenance, and training services. For further information or assistance, call (202) 260-8365 or (202) 260-2098.

## Agency-Wide Integrated Email System

During fiscal year 1994 EPA began implementing its Integrated Email System to facilitate electronic communication among the Agency's widely dispersed employees and affiliates nationwide. Implementation of the Integrated Email System is a continuing process; when completed, the system is expected to support over 25,000 Email users.

The Integrated Email System provides transparent message exchange and document sharing among the various Agency Email systems. These Email systems include ALL-IN-1, GroupWise (previously called WPO), cc:Mail, Lotus Notes Mail, MailWorks, U-Mail, and SMTP. Messages can also be exchanged with users outside the Agency through X.400 and Internet.

The Central Mail Directory (CMD) is an integral part of the Integrated Email System. The CMD, which is maintained by the ETSD, is a comprehensive directory of all registered Integrated Email System users. The CMD can be accessed by all Integrated Email System users through the directory search command(s) of their respective Email systems (e.g., through the use of GroupWise (F4) key or the "Searching the ALL-IN-1 Directory" (SAD) command). The CMD is updated and distributed nightly so that information is as accurate as possible. Users can send messages to any other Integrated Email System user with a simple "name-only" address. As a result, it is not necessary to know the location of the recipients or the type of Email system they use.

All EPA employees and affiliates can participate in the Integrated Email System by obtaining a mailbox on one of the supported Email systems. To obtain a mailbox on the ALL-IN-1 system, contact the Email coordinator for your EPA organization. To obtain a mailbox on the LAN-based Email systems, contact your local LAN system administrator. If you do not know who your Email coordinator or LAN system administrator is, contact Customer Support at (800) 334-2405 or (919) 541-7862.

## Videoconferencing

The Headquarters Services Branch awarded a nationwide contract for rollabout videoconferencing equipment and services on March 22, 1996. The contract includes two types of video units, a document camera, system installation, and maintenance. The units are manufactured by PictureTel, one of the premiere video manufacturers in the world. For information about videoconferencing, call (202) 260-9505.

## Audio Teleconferencing Service

In addition to the standard, three-way conference capability available on most EPA Headquarters telephone sets, the Headquarters Services Branch (HSB) offers two types of audio teleconferencing services to EPA employees: (1) a teleconferencing bridge, which is available for use by all EPA employees nationwide, and (2) portable conferencing units, which are available to Headquarters employees. Scheduling of these services is available, with the appropriate funding, on a first-come, first-served basis by calling (202) 260-CONF (2663).

### Teleconferencing Bridge

The teleconferencing bridge is a state-of-the-art device that enables audio communications between four or more locations. The bridge is available to any EPA employee nationwide, including EPA employees in Puerto Rico and the Virgin Islands. To schedule use of the bridge, dial (202) 260-CONF (2663) between 8 a.m. and 5:30 p.m., e.s.t./e.d.t., Monday through Friday, at least 24 hours in advance. There is a charge to the sponsoring program office for use of the bridge.

### Portable Conference Units

Portable conference units (enhanced speakerphones) are available to Headquarters employees for temporary use. The equipment can be installed in any room that has a telephone line and an electrical outlet. To reserve a portable unit, dial (202) 260-CONF (2663) between 8 a.m. and 5:30 p.m., e.s.t./e.d.t., Monday through Friday, at least 24 hours in advance. Portable units should be picked up 30 minutes prior to the conference.

### Three-Way Conference (Standard)

Most telephone sets at EPA Headquarters offer a standard, three-way conference feature that enables three parties to be connected to the same call at the same time. The instructions below specify how to initiate a three-way conference call from a standard, single-line or multiline telephone set. If your organization has an electronic key system or ISDN equipment, different procedures apply; please consult the appropriate user guide, or call (202) 260-6778.

1. Call your first party.
2. Depress the switchhook or the "Flash" button on your phone.
3. Listen for the dial tone.
4. Dial the next party.
5. Announce the conference.
6. Depress the switchhook or the "Flash" button on your phone.
7. Begin the conversation.

## Federal Information Relay Service (FIRS)

EPA participates in the operators' relay service for the hearing and speech-impaired, which can be used for any Agency official business by calling 1-800-877-8339 (Voice or TDD). Brochures on this service are available from the Washington Telecommunications Center (WTC) (202-260-6778).

## National Locator Service

### National Locator Description

The EPA National Locator is an automated reference system that provides information about EPA employees and on-site contractors nationwide. The National Locator can include information such as EPA employee or contractor status, telephone number, location, mail code, building, and room number. The National Locator facilitates intra-Agency communication by providing the most up-to-date directory information available and delivering it to each workstation.

### National Locator Access

The EPA National Locator database is available nationwide to any employee who has a personal computer (PC) connected to an EPA local area network (LAN) at a Value-Added Backbone Services (VABS) site. VABS is a platform used for delivering national applications and is managed by the ETSD RTP LANSYS group. VABS server sites include Headquarters, Research Triangle Park (RTP), National Enforcement Investigations Center (NEIC), Cincinnati, and all 10 Regional Offices.

If you have a PC-to-EPA-LAN connection and do not yet have access to the National Locator, ask your LAN administrator to add the National Locator as a menu option to your standard LAN menu screen. Your LAN administrator can contact your local information center, local VABS system administrator, or LANSYS to obtain any necessary software and technical guidance.

## National Locator Updates

Typically, National Locator updates occur on a monthly basis. System users report changes to local system administrators who, in turn, update their local Locator databases with the reported changes. The system administrator prepares an updated Locator file for transmission to the Headquarters Services Branch (HSB), where the updated information is then incorporated into the National Locator database.

A list of local database administrators who provide updates for the National Locator follows this section. This list is also available on-line in the National Locator system. To view the list, press the Help key (F1) twice after fully retrieving a record. If you have any questions concerning the EPA National Locator system, call (202) 260-1615.

# International Calling-Country Codes, City Codes and Time Difference

## How to Use This Chart

With the exception of Canada and Caribbean Islands that use the 809 area code, all international long distance calls from the U.S. begin with "011". The number beside each country name is the "Country Code". The number beside each city is the "City Code". Only the capital city is listed; for other City Codes and additional information contact your long distance company.

To determine local time in the country, add or subtract the time difference from eastern time.
